

Technology as a Service (TaaS)

CallTek Your Technology Success Partner

calltekinc.com

Technology moves quickly and successful companies are the ones who are nimble enough to quickly meet the needs of their customers.

CallTek's **Technology as a Service (TaaS)** partnership model is designed to help you win deals, simplify your financial processes, and enhance operational efficiency with capital to begin all aspects of a project as soon as the client signs for the job.

As a white-label service provider, CallTek seamlessly integrates with your brand and offers a comprehensive package that includes third-party finance, on-site implementation, 24/7 remote support, as well as all essential professional services, infrastructure, licensing, and equipment.

By teaming up with CallTek and leveraging our TaaS finance approach, your organization gains a competitive edge in offering cutting-edge technology solutions to your clients. This keeps you ahead of the technological curve and ensuring a predictable IT budget, helping conserve your clients' working capital.

Don't see your equipment listed? Don't worry, we have built finance solutions for almost every equipment type. Contact us to start talking about your customized program today.
